

Voki

Website: voki.com

Create an avatar that speaks what you write. Teachers will create an account, and then students can create their own account and get started. Voki avatars can be shared with the teacher for easy grading or students can present their work. Voki is an interesting way for students to showcase their assignments.

Some ideas are as follows:

Students can answer set questions by the teacher for review or comprehension of a topic.

Vocabulary can be defined and students can then hear the definitions for better understanding and review.

Reports on various topics: periodic table, DNA, Genetics, Newton's Three Laws or Chemical Reactions

Group projects are always a fun idea in Voki.

Here students can each take a topic and put their Voki's together for an interesting and creative presentation.

*reports on rainforests, climates, environments and space can be broken up for each person to have a part in the project.
